

## Upload Image To IBM Container

Date	19 November 2022
Team ID	PNT2022TMID29786
Project Name	Smart Fashion Recommender Application

### CREATING REPOSITORY IN IBM CLOUD:

### Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

## UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. The left sidebar contains a navigation menu with the following items: Container Registry, Quick start, Namespaces (1), Repositories (1), Images (1), Trash (0), and Settings. The main content area is titled 'Namespaces' and shows a location filter set to 'Tokyo'. A notification banner states: 'Viewing filtered namespaces. A filter is applied so that only the namespace sfra is included in the table. Show all namespaces'. Below this, there is a table with the following data:

Name	Resource group	Repository count	Image count	Retention policy
sfra	Default	1	1	Retain all images

Below the main table, there is a section for the 'Repository' 'jp.icr.io/sfra/sfra' with an 'Image count' of 1 and 'Last updated' 2 hours ago. At the bottom of the table, it shows 'Items per page: 25' and '1-1 of 1 item'.
